Visionary Success Strategist

2008 is a “1” year for collective humanity—the first year in a new 9-year cycle. All souls (consciously or unconsciously) agree to venture out of their comfort zone, “take the road less traveled” and be courageous pioneers, way-showers, visionaries and new paradigm builders who lift humanity into a new perception of reality. 2008 sets the energy in motion to bring about monumental shifts in consciousness over the next 9 years.

- ❑ Quest in 2008 is to trance-form individual and collective ways of living, thinking, and being—to broaden horizons—explore new opportunities—travel—and experience a wide array of new things.
- ❑ Pretend you just arrived on this planet and let go of any preconceived ideas about anything and everyone.
- ❑ The energies of 2008 support adventure, curiosity, joy, awakening, creativity, and freedom.
- ❑ This year we are redefining “love” as a primary energy and “spiritual emotion.”
- ❑ Whether you are a baby-boomer, flower child, “cultural creative” or an indigo/crystal grid soul (and regardless of your chronological age) ... whatever your soul is encoded to accomplish in this lifetime ... NOW is your time to get inspired and get going!
- ❑ Manifesting can seem miraculous if you make soul-based choices from your heart’s desires ... instead of creating from the old 3rd dimensional mind-based manifestations.
- ❑ Kiss your comfort zone good-bye !!! Let go of stagnation, get out of ruts, stop letting life pass you by.
- ❑ New new new.....!!!! Expect new insights, ideas, options, friends, interests, home, jobs, etc.
- ❑ Freshen up your home, wardrobe, thinking, friends and everything else in your life.
- ❑ Expect a strong inner desire to move forward, to improve situations, to do something about present conditions, to “get on with it” and gain freedom.
- ❑ Don’t be too hasty in the first half of 2008. Be patient. Lay the groundwork for upcoming changes. The old 9-year cycle has bleed-over into the new “1” year. New directions will need time to fully work out.
- ❑ Joyously practice “letgo-recreate.” No more time gap between letting go and re-creating. Change is now a flow (like the yin/yang symbol) of one energy into the other.
- ❑ Don’t try to maintain status quo by holding on to people, situations, beliefs, roles, and possessions, etc., or it will be painful. Living from the heart will replace old mind-based ways of being.
- ❑ Integrating the intense energy shifts of 2007 will continue to be a challenge in 2008 because the 3rd dimension 5-sense reality has to be trance-formed into a multi-dimensional reality in every facet of life on planet earth.
- ❑ Billions of people will be channels bringing raw creative energy into planet earth. You can use this raw energy in the creative, expressive and healing arts, in business, in problem solving, to create planetary health—and use this raw creative energy for all trance-formational projects.
- ❑ 2008 is a time when the “revelation revolution” kicks into high gear. The “world of illusion” and all that is hidden gets revealed in mind-blowing ways.
- ❑ Don’t get discouraged if you see lots of pain, suffering and violence in 3rd-D reality. Remember shift takes place in the invisible 4th/5th dimensions first, so it’s often hard to “see” humanity is really on the brink of the “new reality” of integrity, harmony and love.
- ❑ The “age of conscious awareness” replaces the three previous ages; agriculture age, industrial age, and the information age.
- ❑ Conscious business, conscious living, conscious breathing, conscious deathing, and intentional conscious co-creation become household words.
- ❑ There is a big push to integrate spiritual & material realities. Millions of people will be searching for authenticity and deeper meaning—waking up and wanting to know who they are, how they got here and where they are going.
- ❑ In 2008 amazing energies support you to “rethink your life” and break free of assumptions handed down through generations over the centuries. You have a destiny (not a destiny of life that is over or a life to “be endured”) but a life of authenticity, joy, awakening and freedom—a life that is truly lived ... the life you know in your heart you were born to live.
- ❑ You don’t need to understand your future and envision every minute detail. You only need to “allow” new creativity.
- ❑ Re-member, trance-form, transcend, unlearn and “shift” —replace old “fix-it or heal minds”
- ❑ Design products, inventions, book titles, music, etc., with “new words”.
- ❑ EMBRACE THE NEW! People are ready for “new words.” Use new words ... words like “venturosity” that have no preconceived definition ... words that arouse curiosity and make people think. “Venturosity” can mean adventure plus curiosity or _____ ?

- Demonstrate your natural leadership abilities in business. Be the person who takes their rightful place at the helm of worthwhile enterprises and projects. Utilize your innate ability and personal power to promote yourself. Connect with influential people who will love helping you manifest your desired future.
- Guard against anxiety, worry, stress, impatience, resentment, seriousness, aggression, inertia, impulsiveness ... and don't force things.
- Ask for what you want, advance your personal interests, be persistent and trust that Universal Forces are in your favor.
- Make use of your natural talents, unconventional wisdom and financial savvy.
- Be an inspiration to others—encourage people to be self-reliant and courageously risk into the unknown.
- WATCHWORDS: Originality, creative thoughts, inventive ideas, courage, initiative, leadership, ingenuity, self-reliance and playfulness.
- Let go of your need for approval AND enjoy being “weird.”
- Practice constructively using the dynamic nature of “energy” (be it creative, sexual, personal magnetism, foods, or products).
- Develop greater confidence, open up, and take risks (even if you're considered odd, strange or outrageous by conventional standards).
- Cultivate creativity, beauty, imagination and exploration.
- Co-create with the dynamic energy of the Universe !!!!!
- Go to museums, art galleries, plays, musical entertainment ... anywhere that will stimulate your creativity and creative expression.
- Expect tests of character, self-confidence, self-worth, courage, energy, trust, creativity and discernment.
- In relationships practice being spiritually centered, pleasant, fun-loving, unconventional, wise, affectionate, morally strong, integrous, self-reliant and respectful.
- This is an action year. Use action to overcome fear.
- Health this year requires being an “empowered energy manager” and monitoring your activities to include plenty of R&R to compensate for the many new exciting activities.
- “Walk in balance”—be like the ancient wise ones. Create balance in your physical being and on your path by balancing the elements of Spirit, Fire, Water, Air and Earth (the elements of all manifestation)
- Exercise to move the creative energy through your body.
- Get energy and body work to remove physical, emotional and creative blocks. Acupuncture, acupressure, hypnosis, visualization and energy medicine will enhance your creativity.
- Rest or take a short vacation if you feel stuck, uncertain or like you're getting nowhere.
- Read, think, meditate and contemplate before jumping in so you don't get stuff you'll regret.
- Be careful that repressed creative energy doesn't get discharged through addictions to (or abuse of) alcohol, tobacco, other drugs, food, sex or control.
- Communicate your changes and ideas to others (especially business and family members) so they don't freak out. Don't say too much unless people are supportive of you and your plans. You're not asking for their approval, just keeping them informed so they have time to adjust.
- Be kindhearted, trustworthy, compassionate and creative.
- Become consciously aware of everything you do and say.
- Let “your river of creativity and inspiration” surge forth!!! Joyously practice your unique brand of creativity whether you're starting a business, marketing yourself, baking a cake, driving your car, selling a house, decorating your home, dressing for an event, making love, singing, dancing, writing, painting, wrapping a gift, being a parent, or resolving a conflict.
- Be a “creative spark.” Activate your creative powers by envisioning yourself as “Merlin the Magician.” Empower yourself to be a masterful manifester of your heart's desires!
- As 2008 unfolds you should feel pleased about your accomplishments, creativity and changes.
- Have FUN allowing vast amounts of creative energy, love, joy and passion to abundantly flow through you into the world. Revel in your trance-formational contributions to “the Great Shift of the Ages” and the continued activation of the AGE of AQUARIUS.

Re-member ... you have magic inside you!

Nine-Year Cycles

by Jeanine Just, November 1998

Time is calculated using cycles which are often thought of as decades, such as 1960-1970, 1970-1980, etc. Most people think of them as ten year cycles, but there are really only nine years in a decade. The tenth year begins a new cycle or decade. Each year brings new issues and opportunities.

What is a Universal Year? Collective humanity (whether individuals are consciously aware of it or not), experience yearly collective issues and opportunities that correspond with the years number. For example, 2001 was a (3) year which means time to lighten-up, playwork, gather lots of new experiences and be spontaneous.

Individuals are also subject to personal 9-year cycles. Understanding your personal year is very powerful. It is a valuable timing device—a “signal” you can use to guide you as you consciously choose appropriate opportunities and experiences.

Often your mind or intellect will suggest a plan of action that is contrary to the invisible desires of your 9-year cycle. If you know and align to your appropriate yearly cycle, you will eliminate struggle, harness the power of good timing, build self-confidence, and increase your chances of success.

Your personal year is calculated on a fiscal year and not a calendar year. Your personal new year doesn't start on January 1st, unless you were born on that day. For example, if your birthday is July 22nd, then your personal year starts on July 22nd and ends on July 21st of the following year. For someone born on December 14th, their new year starts on December 14th and ends on December 13th of the following year.

To identify how the cycles have impacted your life, complete a Time-Line. Chronologically write out your major changes, health issues, decisions you've made, or key relationship changes, etc., to determine what year you were in. The validity of this information is amazing and insightful.

Your personal year is determined by the numerical total of the month plus the day you were born—plus the numerical total of the current year. As an example, if your birthday is January 16, and if the current year is 2006, then your personal year for 2006 is: (January is calculated as a 1) $1 + 1 + 6 + 2 + 0 + 0 + 6 = (16) = 7$. Your personal year “right action number” for 2006 is a 7.

A Condensed Interpretation Of Nine-year Cycles

Each year has issues, challenges and opportunities.

Year 1: You can expect new beginnings, increased creativity, a move to a new location, growth, or a desire to create something new throughout the entire year. One energy is like springtime energy when new growth sprouts everywhere.

Year 2: You can expect to select new friends, associates, and relationships that will support you during your new 9-year cycle. You will create new alliances, partnerships and experience issues around being mutually supported.

Year 3: You are to experience a lot of different experiences this year and have lots of fun. It is a playful year filled with much variety, spontaneity, mystery and lightheartedness.

Year 4: Use your new creative endeavors, new alliances, and the new experiences that you gathered over the past three years—and build solid foundations under your future. This is a year of work, keeping your nose to the grindstone, and stabilizing your life.

Year 5: You can expect everything from the past four years to shift around and you will begin to harvest the fruits of your past labor. A variety of options and choices become available, lots of progressive action, movement, and freedom from past restraints.

Year 6: You are focused this year on giving back to humanity. It is a year of duty, work, responsibility, and a time to expand your personal vision. It's time to share yourself and your gifts with collective humanity.

Year 7: You can expect to take a sabbatical from the outer world activity trap. This is a year of inner spiritual development. Relax, rest, be quiet, allow the wisdom in the DNA of your cells to awaken. Expand into the buried treasures and undeveloped potential that is within you. Be aware of new gifts which can include greater psychic abilities, healing, vision, understanding or creativity.

Year 8: You can expect to experience your personal power, receive respect, money, recognition—and to reap the harvest of your seven previous years. Issues all year will be around accepting your power, feeling empowered, and producing results.

Year 9: This year you can expect to let go of anything and everyone that no longer serves you. Forgive, forget, have faith, and ask yourself, “What do I want to take with me into my future?” What stuff, people, beliefs, etc. It can be an unsettling year. If you don't voluntarily let go—you will be forced to do it involuntarily. Think of yourself as a trapeze artist who has to let go of one hoop to catch another one—and who has to sway back and forth to stay on the tightrope. New beginnings and opportunities are just around the corner, but you'll have to let go to begin again. As stuff keeps falling apart you're likely to feel like you're “really screwing up”—but don't personalize it. It's just what's required in a “9” year. It will help to take the focus off yourself and put it on serving others.
